glass partitions

The design of these partitions is unique in entire world, giving complete freedom to create partitions as per your unique design and creativity, which can also be modified later.

The grid design is achieved with aluminium alloy T6 6063 profiles joined with true mechanical joinery and no pasting with adhesives. This allows each grid to have different sizes and materials including different textured and coloured glass, wood veneer and carving, metal and ceramic tiles and panels , practically any kind of material. The tiles etc can be pasted on base material with groove all around to accommodate greater thickness.

Any panel can be changed at any time, without resorting to disassembling entire partition or breaking any glass etc

GPC1550

15 x 50 mm
fixed, sliding and sliding folding
6, 8, 10 mm glass / any material
Other decorative materials can be pasted
on base panel to achieve more possibilities

Flagship system to create fixed, sliding and sliding folding partitions with complete flexibility of grid design.
nside grid ,made of tapered profile is narrower with 40 mm width, which can be powder coated or anodized in different colour .

GPC1750

17x 50 mm
fixed partitions
8, 10, 12 mm glass / any material
Other decorative materials can be pasted
on base panel to achieve more possibilities

An elegant system to create fixed, partitions with complete flexibility of grid design.
Inside grid can be powder coated or anodized in different colour to create beautiful dual shade partitions.

GPC2060

20x 60 mm
fixed partitions
6, 8 mm glass / any material
Other decorative materials can be pasted
on base panel to achieve more possibilities

A sturdy strong system for fixed partitions also being used in outer partitions at homes, retail and even for facade, as it is not possible to open the panels from outside

door and frames
