In contemporary commercial and residential interiors, most of the services like fire pipes, air conditioning, fire detection and suppression systems, plumbing and more are installed at ceiling level. Maintenance and repair of these services require sturdy and easily operable access trap doors of appropriate size.

Since only fixed and small size modular aluminium trap doors have been available till now, interior designers and architects usually go in for wooden trap doors. Regardless of the brand, all these modular trapdoors have similar designs which if made in bigger sizes easily warp over time. And the wooden ones deteriorate even faster.

IQUBX cutting edge IPR protected and Greenpro certified modular ceiling trap doors can be easily made in any big or small customized size, without the shutters getting bent or warping over time. The largest delivered till date is 18 x 8 feet (5500 x 2400 mm).

These big size trap doors allow complete unobstructed opening as all the shutters can be slid to one or both sides. Each shutter is secured with steel wires, and has Allen key mechanism.

These trap doors blend seamlessly in any interior with just 2 to 3mm groove around the shutters and can accommodate various 12mm material and finishes like gypsum / MR board, POP ceilings, / ACP / Laminate / Veneer on WPC / WPC / wooden / louvered. IQUBX trap doors can even be retrofitted in place of old wooden trapdoor opening.

These are being widely used in interior projects like residential towers, apartments & villas, Universities Malls, Hospitals, Hotels, Airports & offices, across the country and being exported as well

CTD25

Latest design with strong construction, modifiable on site, minimum groove of just 2mm to 3mm visible around shutters, ideal for super big size trap doors

Unique design worldwide

IPR protected - patented

Any Custom sizes

Big sizes (Largest made 18' x 8' till now)

Light weight

Strong shutters don't warp

Any material finish 12mm

(Gypsum / MR board / ACP / Laminate / Veneer on WPC / WPC / wooden / louvered)

6063T6 Aluminium alloy (Recycled)

Greenpro certified by IGBC

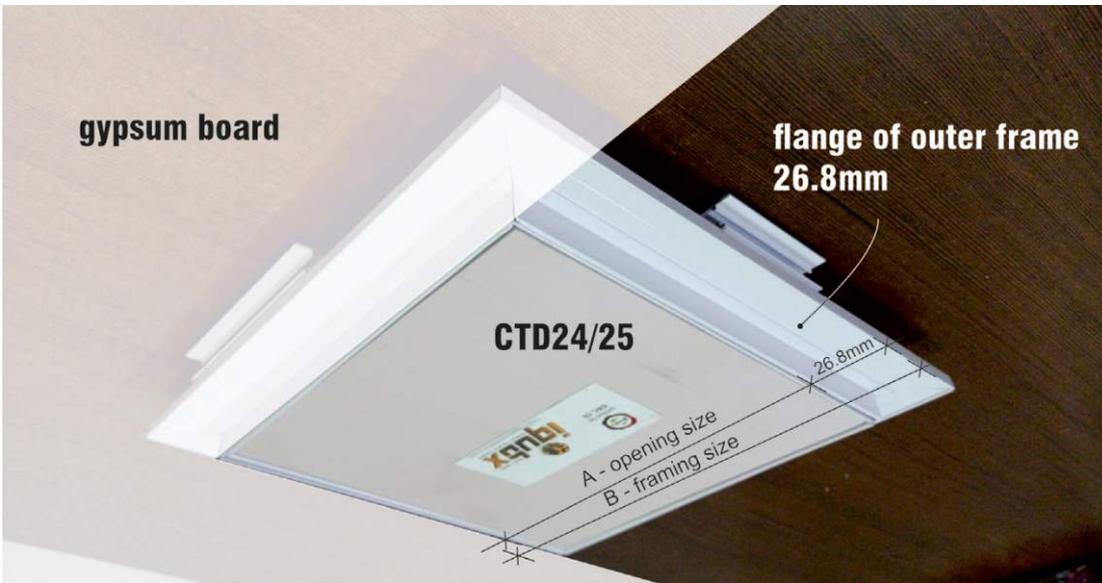

IQUBX CTD025 with Infilled Material

General Specification

Supply of Greenpro certified Lightweight Aluminium Access Ceiling Trapdoor IQUBX CTD025. The trap door to be made of inner frame of section approx 40 x 36mm with integrated stiffener and all functionality, and outer frame of 38 x 27 mm. The Trapdoor to be able to carry 12mm MR board/Painted MDF Board / Painted marine Ply / Prelaminated Board / painted bison board or calcium silicate board / Gypsum board / MPC board / calcium silicate board / ACP sheet as per requirement to match the ceiling finish with no visible flange, and just a groove of 2-3 mm visible all around. Fixed to soffit of slab and / or ceiling frame with appropriate strong support. The trapdoor shutters to be connected with trap door frame with 1 or 2 Chain / SS wire rope and locked with 1 or 2 allen keys / push locks. The trapdoor shutters to be hinged with the outer frame with help of pins which move in outer frame slot, thus acting as sliding hinge. The Ceiling Trapdoor may have one or more openable Lid / Door depending upon the size of trapdoor. Rates without lid infill material. Powder coat finish

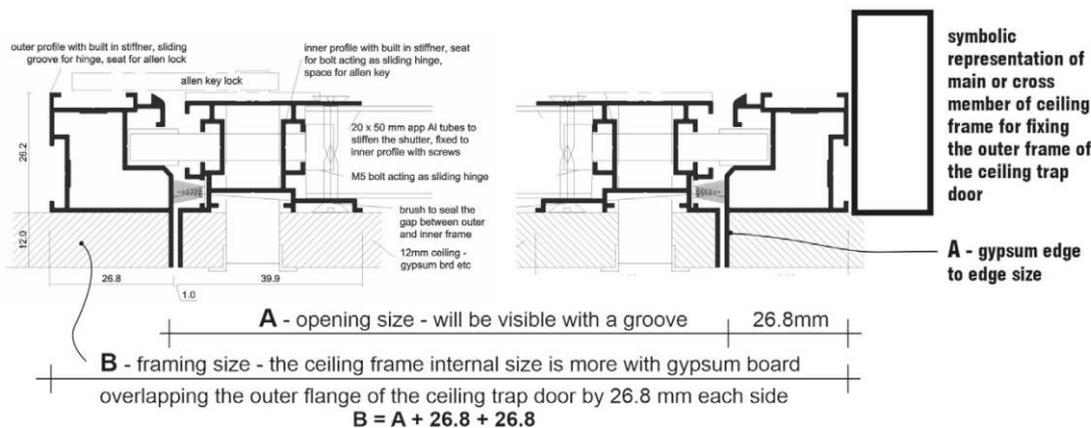

Project Specification

1. Model - CTD025
2. Finish - Powder coated - colour _____
3. Infilled Material - 12 mm MR board / WPC board
4. No. of shutters - _____
5. Locking - Yes
6. Steel Wire -YES
7. Acoustic model - No
8. Installation - _____

GUIDELINE FOR GIVING DIMENSION OF TRAP DOOR WHILE ORDERING

- The order should be given for A, opening size of gypsum
- Care should be taken by ceiling contractor to do the framing support 26.8mm inside from all sides of gypsum opening, against which ceiling trap door outer frame may be fixed with screws etc
- Ideally, the ceiling trap door should be procured beforehand and fixed to the ceiling frame before fixing of gypsum board. The actual size of opening will be 26.8mm shorter on all four sides.
